Conference/workshop Sponsorship from SNDE

The Society for Nonlinear Dynamics and Econometrics (SNDE) provides financial support and sponsorship of selected workshops that are aligned with the Society's mission. In most cases the Association anticipates that it will provide partial funding of up to US$1,000. Typically we provide funding for 3-4 workshops/conferences each year.

A successful application will, in general, be based upon a conference designed to attract experts in their respective fields. Conferences that provide externalities to a large number of researchers are good candidates, as are smaller workshops with high impact in relevant fields. Conferences that have open call for papers are preferred.

Funds are granted on the condition that the contribution is acknowledged in the conference programme and in any published proceedings which might follow.

Applications should be made in writing to the association. Please indicate:

- Topic of the workshop and how it aligns with SNDE’s mission.
- How many people are expected to attend the conference?
- How will the funding be used?
- Does the conference have an opportunity to raise funds through e.g. registration fees?

Please see our contact page for more details.
